

☐ Salesforce Summer Program – Day 9 (4–5 Hours)

☐ Goal for Today

By end of today, you should understand:

- How components communicate
 - Data flow inside applications
 - Event-driven UI behavior
 - Parent-child communication
 - Dynamic application architecture
-

☐ Deep Learning Modules (IMPORTANT)

1 ☐ Lightning Web Components and Salesforce Data

Focus:

- Connecting components with Salesforce data
 - Reactive UI
 - Data retrieval
 - User interaction
-

2 ☐ Communicate Between Lightning Web Components

Focus:

- Parent-child communication
 - Events
 - Data passing
 - Component interaction
-

☐ Light Completion Modules

3 ☐ Visualforce Basics (Overview)

Focus:

- Older Salesforce UI framework
 - Historical understanding only
-

4 ☐ Aura Components Basics (Light Exposure)

Focus:

- Why Aura existed
 - Why LWC replaced it
-

☐ Videos (Verified Working Links)

1 ☐ LWC Communication & Events

<https://www.youtube.com/watch?v=2Kk2m0wKk9E>

Focus:

- Parent-child communication
 - Events
 - Data flow
-

2 ☐ Salesforce LWC Project Tutorial

<https://www.youtube.com/watch?v=SygSI0IT7fU>

Focus:

- Real application thinking
 - UI + backend integration
 - LWC workflow
-

3 ☐ Aura vs LWC

<https://www.youtube.com/watch?v=9m4r2xZIK0U>

Focus:

- Why Salesforce moved toward LWC
 - Performance and architecture
-

4 Visualforce Introduction

<https://www.youtube.com/watch?v=tZb8n5fH0s4>

Focus:

- Legacy Salesforce UI framework
 - Historical understanding
-

CORE TASKS (MANDATORY)

Task 1 Dashboard Architecture

Design:

- Student Dashboard
- Faculty Dashboard
- Admin Dashboard

Now explain:

 Which components communicate with each other?

Task 2 Data Flow Thinking

Choose ONE process:

- Student registration
- Attendance update
- Course allocation

Now explain:

UI →

Validation →

Flow →

Apex →

Database →

Notification

- ☐ Explain the complete flow clearly.
-

Task 3 Modern vs Legacy Thinking

Answer:

- ☐ Why did Salesforce move from:
 - Visualforce/Aura to
 - LWC?
-

Task 4 Reflection Task

Answer:

- ☐ Why do enterprise applications need modular architecture?
-

☐ GitHub Submission

Create:

/day9-lwc-communication/

README.md must include:

- Component Communication
 - Dashboard Design
 - Data Flow Explanation
 - Aura vs LWC
 - Reflection
-

☐ Revision Questions

1. Why do components communicate?
2. Difference between parent-child communication and events?
3. Why is modular architecture useful?
4. Why did Salesforce move toward LWC?

5. What problems happen in tightly coupled systems?
 6. Why is frontend architecture important?
 7. Why should UI and backend remain separate?
 8. Why do large systems need reusable modules?
-

☐ **End of Day Outcome**

You should now clearly understand:

- ☐ Component communication
 - ☐ Modern UI architecture
 - ☐ Data flow in applications
 - ☐ Modular enterprise system design
 - ☐ Why LWC is important in Salesforce
-
