

☐ Salesforce Summer Program – Day 14 (4–5 Hours)

☐ Goal for Today

Today students move from:

“simple automation”

to

“controlled enterprise workflows.”

You will learn:

- Flow logic
- Decision-based automation
- Variables and branching
- Approval workflows
- Governance and controlled processes

This fills one of the important remaining areas from the Trailmix.

☐ Modules To Complete

1 ☐ Flow Builder Logic

Focus:

- Decision elements
 - Branching paths
 - Variables
 - Formula logic
 - Multi-step workflows
-

2 ☐ Approve Records with Approval Processes

Focus:

- Approval workflows
 - Multi-level approvals
 - Enterprise governance
 - Controlled business operations
-

☐ Videos (Properly Verified Working Links)

1 ☐ Introduction to Salesforce Flow Builder | Day 1

<https://www.youtube.com/watch?v=og6WyT2Ry-Y>

Focus:

- Flow Builder basics
- Flow structure
- Resources and logic

Channel:

Apex Hours

2 ☐ Salesforce Flow Crash Course

https://www.youtube.com/watch?v=KV_somNlaxg

Focus:

- Salesforce Flow overview
- Automation concepts
- Beginner-friendly flow understanding

Channel:

Apex Hours

3 ☐ Building Advanced Flows with Choices, Loops, and Apex

<https://www.youtube.com/watch?v=Tr3GG-aLU4Q>

Focus:

- Advanced flow logic
- Choices and loops
- Multi-step automation
- Invocable Apex

Channel:
Apex Hours

☐ CORE TASKS

Task 1 ☐ Multi-Level Approval Design

For your College Management System:

Design approval workflows for:

- Course creation
- Faculty leave request
- Student scholarship request
- Budget approval

Explain:

- who approves?
 - in what order?
 - what happens after approval/rejection?
-

Task 2 ☐ Branching Flow Logic

Create a branching flow example.

Example:

If attendance < 75%
→ warning email

If attendance < 60%
→ parent notification

If attendance < 50%
→ admin escalation

Explain:

- decision points
 - branches
 - actions triggered
-

Task 3 Governance Thinking

Answer:

- ☐ Why can't enterprise systems allow everyone to directly change important records?

Think about:

- security
 - misuse
 - wrong approvals
 - business risk
-

Task 4 Reflection

Answer:

- ☐ Why do enterprises require controlled workflows instead of unrestricted actions?
-

☐ GitHub Submission

Create:

/day14-flow-governance/

README.md should include:

- Approval workflow examples
 - Branching flow logic
 - Governance explanation
 - Reflection
-

☐ Revision Questions

1. Why are approval workflows important?
 2. Why do businesses require governance?
 3. What are branching workflows?
 4. Why should automation follow business rules?
 5. Why are decision nodes important in flows?
 6. Why should enterprises restrict sensitive operations?
 7. Why are approvals important in large organizations?
 8. Why should workflows be auditable?
-

☐ ☐ Rules

- Focus on enterprise workflow thinking
 - Think like a business systems designer
 - Use real-world examples
 - Do NOT memorize blindly
 - Spend around 4–5 hours maximum
-

☐ End of Day Outcome

Students should now clearly understand:

- ☐ Approval workflows
 - ☐ Branching automation logic
 - ☐ Governance and enterprise control
 - ☐ Multi-step business processes
 - ☐ Structured workflow design
-
