

☐ Salesforce Summer Program – Day 15 (4–5 Hours)

☐ Goal for Today

Today students learn:

“Enterprise systems are only as good as their data.”

Focus:

- Data import/export
- Data migration
- Duplicate prevention
- Data quality
- Enterprise governance

This fills another important remaining area from the Trailmix.

☐ Modules To Complete

1 ☐ Data Management

Focus:

- Importing data
 - Exporting data
 - Bulk operations
 - Migration thinking
-

2 ☐ Data Quality

Focus:

- Duplicate prevention
- Validation
- Data consistency
- Enterprise governance

☐ Videos (Properly Verified Working Links)

1 ☐ Introduction to Data Loader in Salesforce

<https://www.youtube.com/watch?v=2KRGa86nbOg>

Focus:

- Installing Data Loader
- Importing data
- Export/export basics
- Beginner workflow

2 ☐ How to Use Data Loader in Salesforce

https://www.youtube.com/watch?v=8xtJ_Ft5nVQ

Focus:

- Uploading CSV data
- Field mapping
- Bulk operations
- Real examples

3 ☐ Salesforce Data Loader Tutorial

<https://www.youtube.com/watch?v=TBHjqvIaBeA>

Focus:

- Insert/update/delete records
- Bulk operations
- Enterprise data handling

☐ CORE TASKS

Task 1 Bad Data Scenarios

Suggest:

10 examples of bad data problems.

Examples:

- duplicate students
- missing email
- wrong department
- invalid attendance
- duplicate course allocation

Explain:

☐ what business problems can happen?

Task 2 Data Migration Thinking

Suppose your college shifts from:

- Excel sheets
to
- Salesforce

What migration challenges might happen?

Think about:

- duplicates
 - missing data
 - inconsistent formats
 - invalid records
-

Task 3 Data Governance Reflection

Answer:

☐ Why is clean and reliable data critical for enterprise systems?

Task 4 Enterprise Thinking

Suppose:
50,000 student records are imported incorrectly.

What problems might happen?

Examples:

- wrong notifications
 - incorrect attendance
 - fee issues
 - reporting errors
-

GitHub Submission

Create:

/day15-data-management/

README.md should include:

- Data quality problems
 - Migration discussion
 - Duplicate prevention ideas
 - Enterprise risks of bad data
 - Reflection
-

Revision Questions

1. Why is clean data important?
 2. What problems happen because of duplicate records?
 3. Why is data migration difficult?
 4. What is Data Loader used for?
 5. Why should enterprises validate imported data?
 6. Why are CSV formats important?
 7. What risks happen during bulk import?
 8. Why is governance important in data management?
-

Rules

- Focus on enterprise thinking
- Use real-world examples

- Think about reliability and governance
- Do NOT memorize tools blindly
- Spend around 4–5 hours maximum

☐ **End of Day Outcome**

Students should now clearly understand:

- ☐ Enterprise data management
 - ☐ Data migration challenges
 - ☐ Duplicate prevention
 - ☐ Importance of clean data
 - ☐ Governance and reliability thinking
-
