

Salesforce Administrator Track – Day 1 (5–6 Hours)

Goal of Day 1

Today you will learn:

- What a Salesforce Administrator does
- How users are managed
- Profiles vs Roles vs Permission Sets
- Identity and Login concepts
- Enterprise security thinking

By the end of today, you should be able to explain:

"How a company controls who can access what in Salesforce."

☐ **Trailhead Modules to Complete**

1. Salesforce Admin: Quick Look

(~5 min)

2. Prepare Your Salesforce Org for Users

(~50 min)

3. User Management

(~45 min)

4. Identity Basics

(~35 min)

5. Permission Set Groups

(~40 min)

These modules collectively teach user administration, permissions, and enterprise security.

☐ **Videos**

Video 1 (Mandatory)

User Management in Salesforce – Apex Hours

<https://www.youtube.com/watch?v=ldFmnwmY7WA>

Watch completely.

Focus:

- User creation
- Login management
- User deactivation
- User administration

([YouTube](#))

Video 2 (Mandatory)

A Profiles to Permission Sets Journey – Apex Hours

<https://www.youtube.com/watch?v=cXwe9Z7JnPU>

Focus:

- Profiles
- Permission Sets
- Access control
- Modern Salesforce security model

([YouTube](#))

Reading Resource (15 mins)

Identity Flows in Salesforce & SSO

Read only the concepts section:

- Single Sign-On
- Identity Provider
- Service Provider

[Identity Flows in Salesforce & SSO](#)

☐ Practical Exercise

Assume Vishnu Institute is implementing Salesforce.

Create the following users:

- Student
- Faculty
- Placement Officer
- HOD
- Principal
- Salesforce Administrator

For each role define:

Can View?

Can Create?

Can Edit?

Can Delete?

for:

- Student Records
 - Course Records
 - Placement Records
 - Attendance Records
-

☐ Enterprise Thinking Exercise

Suppose a student accidentally receives Administrator access.

Answer:

1. What problems might occur?
 2. What data could be exposed?
 3. What records could be modified?
 4. How would you prevent this?
-

☐ GitHub Submission

Create:

/admin-day1-user-management/

README.md should contain:

What is a Salesforce Administrator?

Difference Between

- User
- Role
- Profile
- Permission Set

College Security Design

Administrator Access Risks

Reflection

Why do enterprise systems need strong access control?

☐ Interview Questions

1. What is a Salesforce User?
 2. What is a Profile?
 3. What is a Permission Set?
 4. Difference between Role and Profile?
 5. Why should users not be given Admin access?
 6. What is Single Sign-On?
 7. What is Identity Management?
 8. How does Salesforce secure data?
 9. Why can a user have multiple Permission Sets but only one Profile?
 10. What does a Salesforce Administrator do?
-

☐ End of Day Outcome

You should now be able to explain:

- ☐ What a Salesforce Administrator does

- ☐ How users are managed
- ☐ Difference between Roles, Profiles and Permission Sets
- ☐ Identity and login concepts
- ☐ How enterprises secure access to data

This is one of the most practical and frequently asked areas in Salesforce Admin interviews.
