

☐ Salesforce Administrator Track – Day 3 (5–6 Hours)

☐ Goal of Day 3

Today you will learn:

- Data Import
- Data Export
- Data Loader
- Data Quality
- Duplicate Management
- Data Migration

By the end of today, you should be able to explain:

"How organizations move and maintain data inside Salesforce."

☐ Trailhead Modules

Complete:

- 1. Data Management**
- 2. Data Quality**
- 3. Import and Export with Data Management Tools**

If time permits:

- 4. Duplicate Management**
-

☐ Videos (Verified Working Links)

Video 1 (Mandatory)

Salesforce Data Loader Tutorial

<https://www.youtube.com/watch?v=2KRGa86nbOg>

Focus:

- What is Data Loader?
 - Importing CSV files
 - Updating records
 - Exporting data
-

Video 2 (Mandatory)

How to Import Data in Salesforce

https://www.youtube.com/watch?v=8xtJ_Ft5nVQ

Focus:

- Import Wizard
 - CSV mapping
 - Common import errors
-

Video 3 (Optional)

Salesforce Data Loader Complete Tutorial

<https://www.youtube.com/watch?v=TBHjqvIaBeA>

Focus:

- Insert
 - Update
 - Upsert
 - Delete
 - Export
-

☐ Practical Exercise

Assume Vishnu Institute currently stores data in Excel.

You need to migrate:

- Student Records
- Faculty Records
- Placement Records

- Attendance Records

Answer:

1. What challenges might occur?
2. What data needs cleaning?
3. What duplicate records might exist?
4. What validations are needed?

☐ Data Quality Exercise

Give 10 examples of poor data quality.

Examples:

- Missing email
- Wrong phone number
- Duplicate student
- Wrong branch
- Invalid placement status

For each example explain:

- What business problem it creates
- How Salesforce can prevent it

☐ Enterprise Thinking Exercise

Suppose:

50,000 student records are imported incorrectly.

What can happen?

Think about:

- Reports
- Dashboards
- Placements
- Notifications
- Analytics

Write at least 10 consequences.

☐ **GitHub Submission**

Create:

/admin-day3-data-management/

README.md should contain:

What is Data Management?

What is Data Loader?

Difference Between Import Wizard and Data Loader

Data Migration Challenges

Data Quality Problems

Reflection

Why is clean data important for decision making?

☐ **Interview Questions**

1. What is Data Loader?
2. What is Data Import Wizard?
3. Difference between Import Wizard and Data Loader?
4. What is Data Quality?
5. What is Duplicate Management?
6. What is Upsert?
7. Why is data cleaning important?
8. Why do migration projects fail?
9. What problems occur because of duplicate data?
10. Why is data governance important?

☐ **End of Day Outcome**

You should now understand:

- ☐ Data Loader
- ☐ Data Import Wizard
- ☐ Data Migration
- ☐ Data Quality
- ☐ Duplicate Prevention
- ☐ Enterprise Data Governance

This is one of the most practical areas of Salesforce Administration because almost every real-world implementation involves moving data from Excel, databases, or legacy systems into Salesforce.
