

Salesforce Administrator Track – Day 5 (5–6 Hours)

Theme

Lightning Experience Customization + Lightning App Builder

Today you will learn how Salesforce Administrators customize the user experience without writing code.

This is one of the most practical admin skills because admins spend a lot of time improving usability and productivity for business users.

Goal of Day 5

By the end of today you should be able to explain:

"How an Admin customizes Salesforce pages and applications without coding."

Trailhead Modules

Complete:

1. Lightning Experience Customization

2. Customize a Salesforce Object

3. Lightning App Builder

These modules are core parts of the Admin path.

Videos (Verified Working Links)

Video 1 (Mandatory)

Get Started with the Lightning App Builder Salesforce Trailhead Complete Guide

<https://www.youtube.com/watch?v=uQgbAIyShj8>

Focus:

- What is Lightning App Builder
 - Home Pages
 - Record Pages
 - App Pages
 - Drag-and-drop customization
-

Video 2 (Mandatory)

Build A Custom Salesforce App in 15 Minutes

<https://www.youtube.com/watch?v=v1sAnmIatQc>

Focus:

- Building an app without coding
 - Custom objects
 - Admin productivity
 - Point-and-click development
-

Video 3 (Mandatory)

Salesforce - Get Started with the Lightning App Builder

<https://www.youtube.com/watch?v=H2DmHRdaWnc>

Focus:

- Lightning Pages
 - Components
 - Layouts
 - Lightning Experience
-

Video 4 (Optional)

Creating Dynamic Experience with Lightning App Builder

<https://www.youtube.com/watch?v=dQTa4sijMqY>

Focus:

- Dynamic pages
 - Component visibility
 - Personalized user experience
-

☐ Practical Exercise

Assume Vishnu Institute is implementing Salesforce.

Design:

Student Record Page

Include:

- Personal Information
 - Attendance
 - Internships
 - Placement Status
 - Notifications
-

Faculty Dashboard

Include:

- Assigned Students
 - Attendance Alerts
 - Internship Updates
 - Upcoming Activities
-

Placement Officer Dashboard

Include:

- Eligible Students
 - Company Visits
 - Placement Statistics
 - Recent Applications
-

☐ Enterprise Thinking Exercise

Faculty members complain:

- Too many fields
- Difficult navigation
- Slow workflow

Answer:

How can Lightning App Builder improve productivity?

Give at least 10 suggestions.

☐ Application Design Exercise

Imagine Vishnu Institute wants a simple:

Student Placement Tracker App

Design:

- Objects required
- Pages required
- Reports required
- Dashboard required

No coding required.

Think like a Salesforce Administrator.

☐ GitHub Submission

Create:

/admin-day5-lightning-app-builder/

README.md should contain:

What is Lightning Experience?

What is Lightning App Builder?

Student Record Page Design

Faculty Dashboard Design

Placement Dashboard Design

Placement Tracker App Design

Reflection

Why should different users have different user interfaces?

☐ Interview Questions

1. What is Lightning Experience?
 2. What is Lightning App Builder?
 3. Difference between Home Page and Record Page?
 4. What is an App Page?
 5. Why customize page layouts?
 6. Why should users have different interfaces?
 7. What are Lightning Components?
 8. What is Dynamic Visibility?
 9. How can admins improve productivity without coding?
 10. What is a Lightning App?
-

☐ End of Day Outcome

You should now understand:

- ☐ Lightning Experience
- ☐ Lightning App Builder
- ☐ Home Pages
- ☐ Record Pages
- ☐ App Pages
- ☐ User Experience Design

☐ No-Code Customization

☐ Admin Application Design Thinking

This is one of the highest-value admin topics because it teaches how Salesforce can be adapted to different business teams without writing code.
