

☐ Salesforce Summer Program – Day 17 (4–5 Hours)

☐ Goal for Today

Today students learn:

“How AI and autonomous agents are entering enterprise software systems.”

This day is meant to be:

- exploratory
- conceptual
- future-oriented
- exciting

Focus:

- Agentforce
- AI agents
- automation with reasoning
- AI-assisted enterprise workflows

This covers the remaining Agentforce/AI modules from the Trailmix.

☐ Modules To Complete

1 ☐ Become an Agentblazer Champion 2026

Focus:

- Agentic AI concepts
 - Salesforce AI ecosystem
 - Enterprise AI direction
-

2 ☐ Agentforce Vibes Extension

Focus:

- AI-assisted developer workflow
 - VS Code integration
 - Productivity enhancement
-

3 Build an Agent Using Agentforce DX

Focus:

- AI agents
 - Actions
 - Topics
 - Prompt-driven workflows
-

4 Agent Customization with Apex

Focus:

- Extending agents with Apex
 - Enterprise customization
 - AI + business logic integration
-

Videos (Properly Verified Working Links)

1 What Is Agentforce and How Businesses Use AI Agents | Dreamforce 2024

<https://www.youtube.com/watch?v=irdNqlytsLc>

Focus:

- What Agentforce is
- AI agents in enterprise systems
- Real-world business use cases

Channel:
Salesforce

2 How Does Agentforce Work? AI Service Agent Demo

<https://www.youtube.com/watch?v=5GFGTuCONJc>

Focus:

- AI agent workflows
- Topics and actions
- Flows + Apex integration
- Enterprise AI automation

Channel:
Salesforce

3 How to Create a Custom Agentforce Agent (Builder Demo)

<https://www.youtube.com/watch?v=RmlLckaK4d8>

Focus:

- Building custom AI agents
- Agent Builder
- Prompt-driven workflows
- Record-triggered agent actions

Channel:
Salesforce

4 Welcome to the Course "Agentforce for Everyone"

https://www.youtube.com/watch?v=XI_De_uYUmY

Focus:

- Agentforce ecosystem overview
- AI workflows
- Agent actions
- AI + Flow + Apex integration

Channel:
Salesforce Codey

☐ CORE TASKS

Task 1 ☐ AI Use Cases

Suggest:

5 AI-agent use cases for:

- college management
- placements
- recruitment
- student support
- faculty operations

Examples:

- AI attendance assistant
 - AI course advisor
 - AI placement recommendation system
-

Task 2 ☐ AI Workflow Thinking

Explain this flow:

User asks question →
AI Agent →
Flow/Apex →
Database →
Response generation →
Action execution

- ☐ Explain how AI agents integrate with enterprise systems.
-

Task 3 ☐ Risks of AI Systems

Discuss:

- hallucinations
- wrong automation
- privacy risks
- bias
- incorrect approvals
- over-automation

- ☐ Why should enterprises carefully control AI systems?
-

Task 4 Reflection Task

Answer:

- ☐ How might AI agents change enterprise software development in the next 5 years?
-

☐ GitHub Submission

Create:

/day17-agentforce-ai/

README.md should include:

- Agentforce summary
 - AI agent use cases
 - AI workflow explanation
 - Risks of enterprise AI
 - Reflection
-

☐ Revision Questions

1. What is an AI agent?
 2. How is Agentforce different from a chatbot?
 3. Why do AI agents need enterprise data?
 4. Why should AI systems have guardrails?
 5. What risks exist in autonomous systems?
 6. Why should enterprises carefully validate AI actions?
 7. How can AI integrate with Flows and Apex?
 8. Why is AI becoming important in enterprise software?
-

☐ ☐ Rules

- Focus on concepts, not hype
- Think critically about AI systems
- Use real-world examples

- Do NOT blindly trust AI outputs
 - Spend around 4–5 hours maximum
-

☐ **End of Day Outcome**

Students should now clearly understand:

- ☐ What Agentforce is
 - ☐ How enterprise AI agents work
 - ☐ AI + Flow + Apex integration
 - ☐ Risks and governance of AI systems
 - ☐ Future direction of enterprise software
-
